

Pest Advisory Report

DUNYA PUR

Timeframe: 3 WEEK MAY 2022

Survey Summary

Overall Severity:	LOW (0.0/30)
Risk Level:	LOW
Action Urgency:	MONITOR
Economic Impact:	0% estimated yield loss
Total Spots Surveyed:	41
Total Area Covered (acres):	280.0
Pest Pressure per Acre:	0.0
Threat Pests:	None

Key Insights & Threats

Critical Threat Pests

No pests above critical thresholds detected.

Key Insights

1. Pest populations are extremely low, indicating a favorable situation for cotton crops.
2. Disease pressure is also negligible, with no reported infections in the surveyed area.
3. The overall risk level remains LOW due to the absence of significant pest or disease threats.

Expert Advisory for Farmers

Follow these practical steps to safeguard the crop based on current field conditions:

Actionable Guidance (English)

- Continue monitoring fields regularly and maintain good agricultural practices to ensure the low-risk situation persists.
- No chemical applications are recommended at this time, as pest populations remain below threshold levels. Focus on cultural controls and integrated pest management (IPM) strategies.
- Coordinate with local extension services or agricultural experts for guidance on maintaining a healthy and productive cotton crop.
