

Pest Advisory Report CHISHTIAN

Timeframe: 1 WEEK MAY 2022

Survey Summary

Overall Severity:	LOW (0.0/30)
Risk Level:	LOW
Action Urgency:	MONITOR
Economic Impact:	0% estimated yield loss
Total Spots Surveyed:	13
Total Area Covered (acres):	37.0
Pest Pressure per Acre:	0.0
Threat Pests:	None

Key Insights & Threats

Critical Threat Pests

No pests above critical thresholds detected.

Key Insights

1. Pest population trends indicate a low risk of infestation, with all pests below their respective ETL thresholds.
2. Disease pressure is also low, with no infected spots or area reported for CLCuV and Wilt.
3. The overall severity score remains LOW due to the absence of any pest or disease issues.

Expert Advisory for Farmers

Follow these practical steps to safeguard the crop based on current field conditions:

Actionable Guidance (English)

- Monitor your cotton fields regularly to ensure early detection of any potential threats. No action is required at this time.
- Continue with regular crop management practices, and consider implementing Integrated Pest Management (IPM) strategies to minimize the risk of infestation.
- Coordinate with local agricultural experts or extension services for guidance on best practices for pest management and disease control.
