

Pest Advisory Report

JHANG

Timeframe: 1 WEEK MAY 2022

Survey Summary

Overall Severity:	LOW (0.0/30)
Risk Level:	LOW
Action Urgency:	MONITOR
Economic Impact:	0% estimated yield loss
Total Spots Surveyed:	11
Total Area Covered (acres):	66.0
Pest Pressure per Acre:	0.0
Threat Pests:	None

Key Insights & Threats

Critical Threat Pests

No pests above critical thresholds detected.

Key Insights

1. Pest populations are extremely low, indicating a healthy cotton crop.
2. Disease pressure is also negligible, with no reported infections.
3. The overall risk level remains **LOW** due to the absence of any significant pest or disease threats.

Expert Advisory for Farmers

Follow these practical steps to safeguard the crop based on current field conditions:

Actionable Guidance (English)

- Continue monitoring your fields regularly for any signs of pests or diseases. With such low levels of infestation, proactive management can help maintain a healthy crop.
- Consider implementing Integrated Pest Management (IPM) strategies to minimize the risk of future infestations. This may include crop rotation, biological control methods, and targeted chemical applications.
- Coordinate with local agricultural experts and extension services to stay informed about any changes in pest or disease pressure and adjust your management plan accordingly.
