

# Pest Advisory Report

## KHANEWAL

Timeframe: 3 WEEK MAY 2022

### Survey Summary

Overall Severity:	LOW (0.0/30)
Risk Level:	LOW
Action Urgency:	MONITOR
Economic Impact:	Estimated yield loss: 0-5%
Total Spots Surveyed:	36
Total Area Covered (acres):	371.0
Pest Pressure per Acre:	0.02
Threat Pests:	None

# Key Insights & Threats

## Critical Threat Pests

No pests above critical thresholds detected.

## Key Insights

1. Pest populations are below threshold levels, indicating a low risk of economic damage.
2. Disease pressure is negligible, with no infected spots or area reported.
3. The overall severity score remains LOW due to the absence of ETL violations.

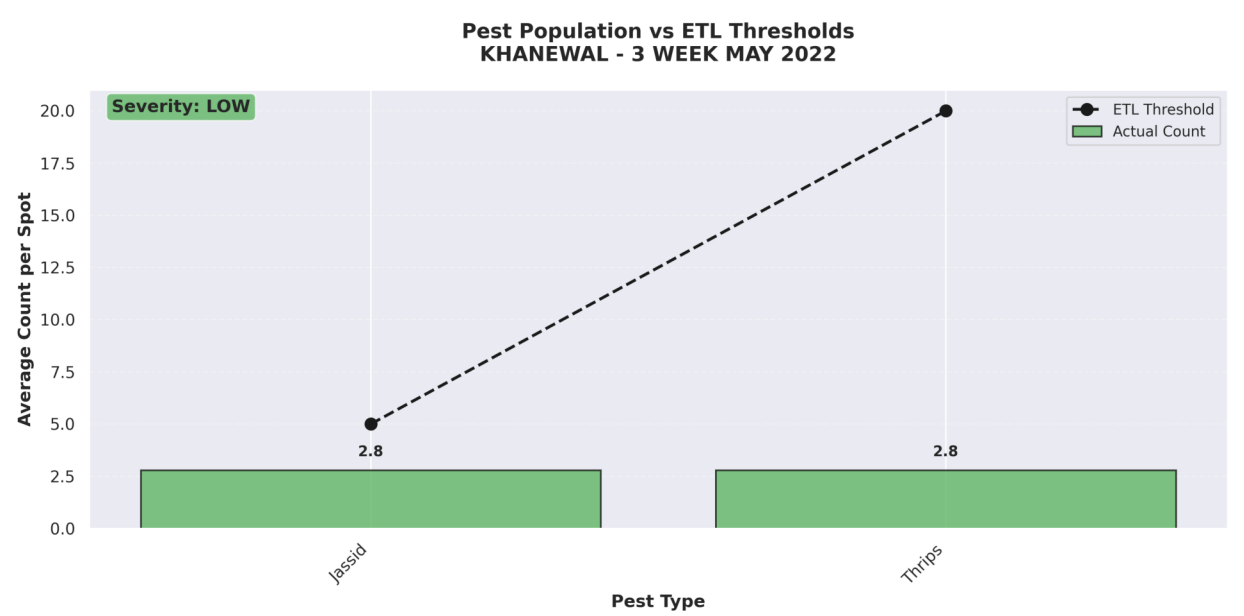

# Expert Advisory for Farmers

Follow these practical steps to safeguard the crop based on current field conditions:

## Actionable Guidance (English)

- Monitor your fields regularly for any signs of pest infestation and adjust your IPM strategy accordingly.
- Continue using integrated pest management (IPM) techniques, such as crop rotation and biological control methods, to maintain a low pest pressure.
- Coordinate with local agricultural experts or extension services to stay updated on the latest best practices in cotton pest management.
