

# Pest Advisory Report

## GOJRA

Timeframe: 1 WEEK MAY 2022

### Survey Summary

|                             |                         |
|-----------------------------|-------------------------|
| Overall Severity:           | LOW (0.0/30)            |
| Risk Level:                 | LOW                     |
| Action Urgency:             | MONITOR                 |
| Economic Impact:            | 0% estimated yield loss |
| Total Spots Surveyed:       | 17                      |
| Total Area Covered (acres): | 33.0                    |
| Pest Pressure per Acre:     | 0.0                     |
| Threat Pests:               | None                    |

# Key Insights & Threats

## Critical Threat Pests

No pests above critical thresholds detected.

## Key Insights

1. Pest population trends indicate a low risk of infestation, with all pests below their respective ETL thresholds.
2. Disease pressure is also low, with no infected spots or area reported for CLCuV and Wilt.
3. The overall severity score of 0.0/30 suggests that the cotton crop in Gojra Tehsil is at a low risk of damage from pests and diseases.

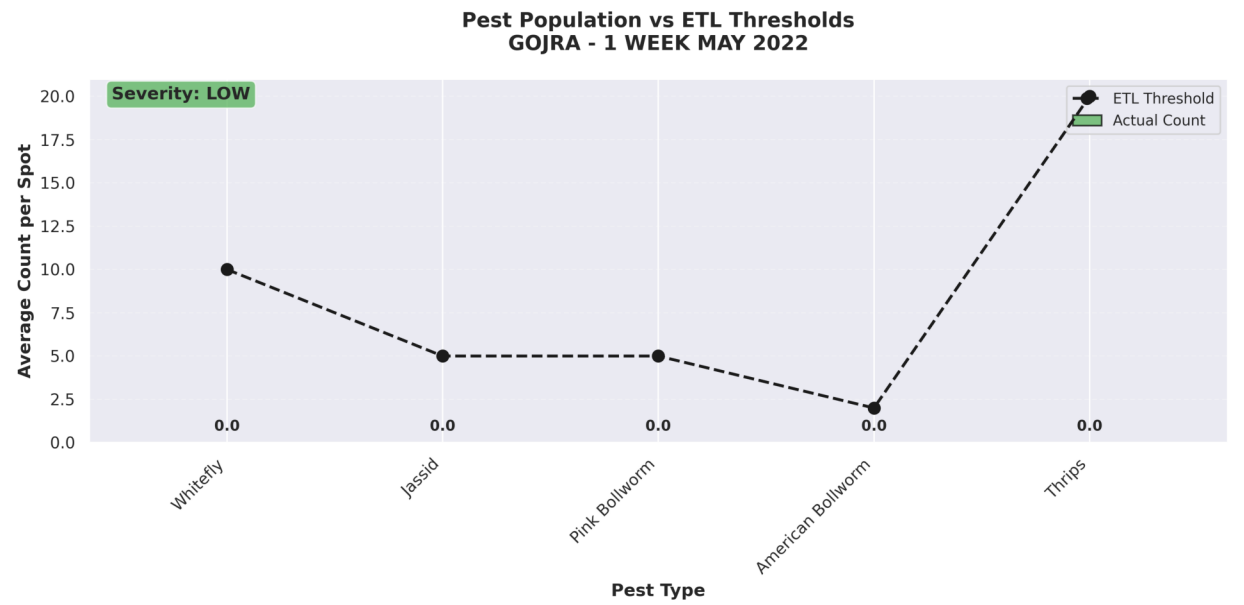

# Expert Advisory for Farmers

Follow these practical steps to safeguard the crop based on current field conditions:

## Actionable Guidance (English)

- Continue monitoring pest populations and disease pressure to ensure early detection of any potential issues.
- No chemical applications are recommended at this time, as all pests are below their ETL thresholds.  
Focus on maintaining good agricultural practices and crop health.
- Coordinate with local extension services and other farmers in the area to share best practices and stay informed about any changes in pest or disease pressure.
