

Pest Advisory Report

T.T.SINGH

Timeframe: 1 WEEK MAY 2022

Survey Summary

Overall Severity:	LOW (0.0/30)
Risk Level:	LOW
Action Urgency:	MONITOR
Economic Impact:	0% estimated yield loss
Total Spots Surveyed:	18
Total Area Covered (acres):	28.0
Pest Pressure per Acre:	0.0
Threat Pests:	None

Key Insights & Threats

Critical Threat Pests

No pests above critical thresholds detected.

Key Insights

1. Pest populations are extremely low, indicating a favorable situation for cotton crops.
2. Disease pressure is also negligible, with no reported infections in the surveyed area.
3. The overall risk level remains **LOW** due to the absence of any significant pest or disease threats.

Expert Advisory for Farmers

Follow these practical steps to safeguard the crop based on current field conditions:

Actionable Guidance (English)

- Continue monitoring your fields regularly and report any unusual sightings to ensure early detection of potential issues.
- No chemical applications are recommended at this time, as pest populations remain below threshold levels. Focus on maintaining good agricultural practices and crop health.
- Coordinate with local extension services or experts for guidance on integrated pest management (IPM) strategies and best practices for your specific region.
