

Pest Advisory Report

MULTAN

Timeframe: 1 WEEK MAY 2022

Survey Summary

| | |
|-----------------------------|-------------------------|
| Overall Severity: | LOW (0.0/30) |
| Risk Level: | LOW |
| Action Urgency: | MONITOR |
| Economic Impact: | 0% estimated yield loss |
| Total Spots Surveyed: | 15 |
| Total Area Covered (acres): | 42.0 |
| Pest Pressure per Acre: | 0.0 |
| Threat Pests: | None |

Key Insights & Threats

Critical Threat Pests

No pests above critical thresholds detected.

Key Insights

1. Pest population trends indicate a low risk of infestation, with all pests below their respective ETL thresholds.
2. Disease pressure is also very low, with no infected spots or area reported for CLCuV and Wilt.
3. The overall severity score remains LOW due to the absence of any pest or disease pressures.

Expert Advisory for Farmers

Follow these practical steps to safeguard the crop based on current field conditions:

Actionable Guidance (English)

- Continue monitoring your cotton crop regularly to ensure early detection of any potential threats.

No immediate action required.
- As a precautionary measure, consider implementing Integrated Pest Management (IPM) strategies to minimize the risk of infestation. This may include crop rotation, biological control methods, and targeted chemical applications if necessary.
- Coordinate with local agricultural experts or extension services to stay informed about any changes in pest populations or disease pressure in your area.

Pest Comparison vs ETL Thresholds
