

Pest Advisory Report

JALAL PUR P.W

Timeframe: 1 WEEK MAY 2022

Survey Summary

Overall Severity:	LOW (0.0/30)
Risk Level:	LOW
Action Urgency:	MONITOR
Economic Impact:	0% estimated yield loss
Total Spots Surveyed:	9
Total Area Covered (acres):	36.0
Pest Pressure per Acre:	0.0
Threat Pests:	None

Key Insights & Threats

Critical Threat Pests

No pests above critical thresholds detected.

Key Insights

1. Pest population trends indicate a low risk of infestation, with all pests below their respective ETL thresholds.
2. Disease pressure is also extremely low, with no infected spots or area reported for CLCuV and Wilt.
3. The overall economic impact is negligible, with an estimated yield loss of 0%.

Expert Advisory for Farmers

Follow these practical steps to safeguard the crop based on current field conditions:

Actionable Guidance (English)

- Continue monitoring pest populations and disease pressure to ensure the low risk remains stable. No immediate action required.
- No chemical intervention necessary at this time. Focus on maintaining good agricultural practices and crop health.
- Coordinate with local extension services for any additional guidance or support, if needed.
