

# Pest Advisory Report

## ALI PUR

Timeframe: 1 WEEK MAY 2022

### Survey Summary

Overall Severity:	LOW (0.0/30)
Risk Level:	LOW
Action Urgency:	MONITOR
Economic Impact:	Estimated yield loss: 0-5%
Total Spots Surveyed:	22
Total Area Covered (acres):	212.0
Pest Pressure per Acre:	0.02
Threat Pests:	None

# Key Insights & Threats

## Critical Threat Pests

No pests above critical thresholds detected.

## Key Insights

1. Pest population trends indicate a low risk of infestation, with no pests exceeding ETL thresholds.
2. Disease pressure is also low, with no infections detected in the surveyed area.
3. The overall economic impact is expected to be minimal due to the low pest and disease pressure.

# Expert Advisory for Farmers

Follow these practical steps to safeguard the crop based on current field conditions:

## Actionable Guidance (English)

- Monitor your fields regularly for any signs of jassid infestation, as this pest can quickly spread if left unchecked.
- Consider implementing integrated pest management (IPM) strategies to minimize the risk of jassid damage. This may include crop rotation, biological control methods, and targeted chemical applications.
- Coordinate with local agricultural experts or extension services to stay informed about any changes in pest populations or disease pressure in your area.
