Key Insights & Threats

Critical Threat Pests

No pests above critical thresholds detected.

Key Insights

1. No significant pest populations or disease pressure detected in the surveyed area.
2. The low severity and absence of pests/diseases indicate a stable cotton crop health.

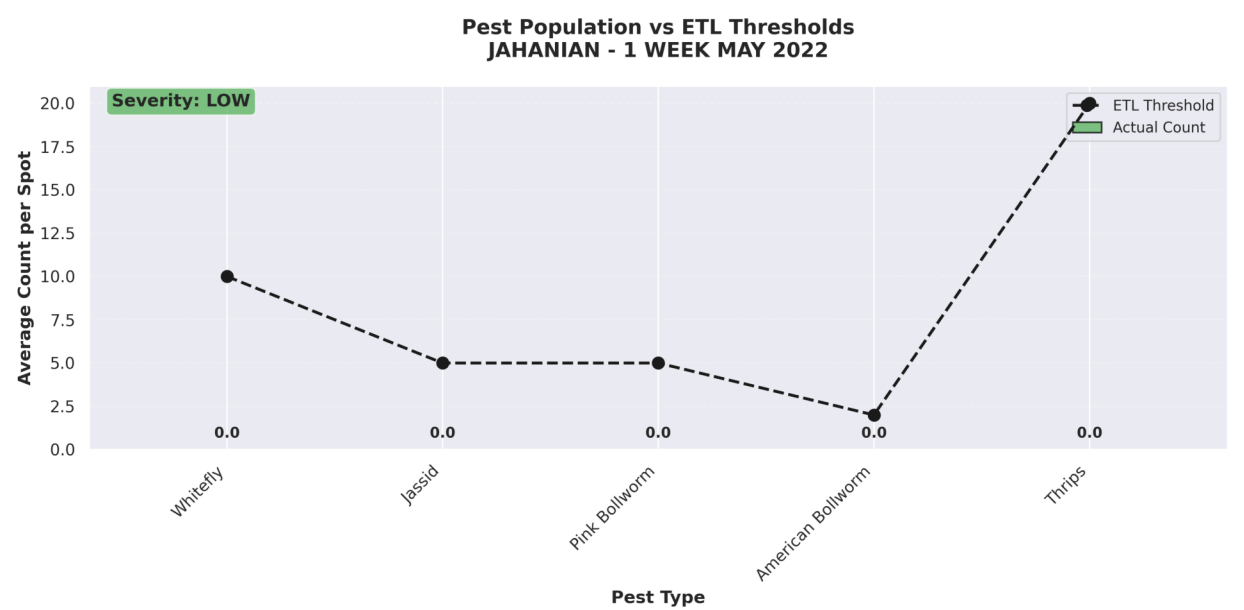

Expert Advisory for Farmers

Follow these practical steps to safeguard the crop based on current field conditions:

Actionable Guidance (English)

- Continue monitoring the field for any signs of pest infestation or disease development, as this will help identify potential issues early on.
- No chemical applications are recommended at this time. Instead, focus on maintaining good agricultural practices and monitoring the field regularly.
- Coordinate with local extension services to stay informed about any changes in pest/disease pressure and receive guidance on integrated pest management (IPM) strategies.
