

# Pest Advisory Report

## D.G.KHAN

Timeframe: 1 WEEK MAY 2022

### Survey Summary

Overall Severity:	LOW (0.0/30)
Risk Level:	LOW
Action Urgency:	MONITOR
Economic Impact:	0% estimated yield loss
Total Spots Surveyed:	28
Total Area Covered (acres):	98.0
Pest Pressure per Acre:	0.0
Threat Pests:	None

# Key Insights & Threats

## Critical Threat Pests

No pests above critical thresholds detected.

## Key Insights

1. Pest population trends indicate a low risk of infestation, with all pests below their respective ETL thresholds.
2. Disease pressure is also very low, with no infected spots or area reported for CLCuV and Wilt.
3. The overall severity score remains LOW due to the absence of any pest or disease issues.

# Expert Advisory for Farmers

Follow these practical steps to safeguard the crop based on current field conditions:

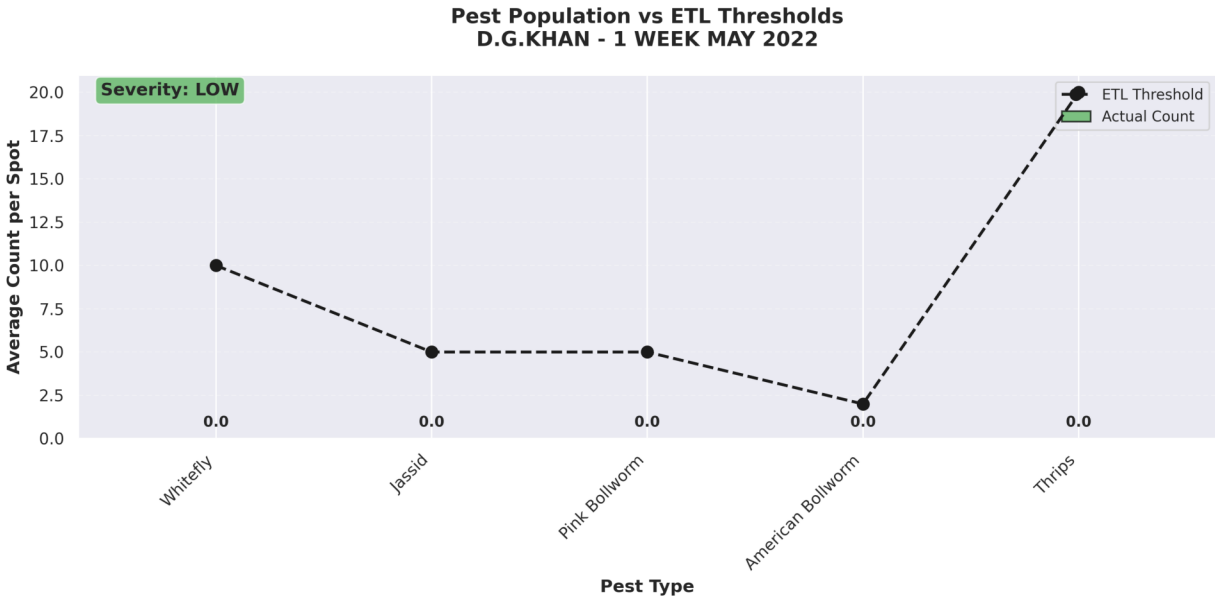

## Actionable Guidance (English)

- Continue monitoring your cotton fields regularly to ensure early detection of any potential threats.

No action is required at this time.

- As a precautionary measure, consider implementing Integrated Pest Management (IPM) strategies to prevent infestations. This may include crop rotation, biological control methods, and targeted chemical applications if necessary.
- Coordinate with local agricultural experts or extension services for guidance on maintaining a healthy cotton crop and responding to any potential pest or disease issues.
